\*\*\*ASK FOR A QUOTATION

Deep cleaning is recommended when there is

**organic residue on the rug or pet bed.**

The service includes: pick-up, pressure wash, stain and odor treatment and a final dry cleaning procedure and delivery.

The complete elimination of stains and odor is not guaranteed.

Service includes washing and disinfecting of textile surfaces. We use original, imported detergent, which is injected into the fabric under pressure. Dirt, mites, allergens, bacteria ect. are removed. After the cleaning process, the furniture will be damp and will completely dry within 3-4 hours, a fan is recommended to speed up the drying. Some stains and odors might not be removed, it will depend on the type of material, the type of stain and how long the stain has been there.

In general, excellent results are obtained.
